# UNIQUE PRODUCTS FOR HORSES

We produce feed for you on a modern granulation line in a gentle, innovative way to ensure the top quality of the resulting feed. In order to maintain high digestibility, raw materials are used that are hydrothermally treated. We produce muesli mixes in a way that allows us to produce feed with an optimal mix structure.

## CLASSIC muesli

20 kg

Barley, hydrothermally treated barley, corn, hydrothermally treated corn, wheat bran, alfalfa meal, hydrothermally treated peas, apple pomace, monocalcium phosphate, rapeseed oil, extracted soybean meal, extracted sunflower meal, flax seed, calcium carbonate, beet molasses, chloride sodium, magnesium oxide

Dose per 100 kg d.v. 310 g for light work per day

A very tasty muesli mixture for horses in light work. It manifests itself as a "quiet" fodder, due to its composition it is suitable for more excitable horses. The feed ideally complements the nutritional needs of horses in hobby and recreational mode.

# UNIQUE PRODUCTS FOR HORSES

The recipes are compiled in such a way that they correspond to the latest scientific knowledge in the field of horse nutrition according to scientific studies by the NRC (National Research Council). Microelements added to horse mixtures are subsidized both in highly absorbable forms of organic chelate compounds and in longer-lasting inorganic forms in a unique mutual ratio.

## ENDURACER muesli

20 kg

Barley seed, Barley hydrotermic flake, Corn hydrotermic flake, Rapeseed oil, Rice bran, Wheat bran, Apple pomace, Pea hydrotermic flake, Dry Sugar beet cuttings, Dried fodder, Corn seed, Linseed, Milk thistle, Limestone, MCP, salt, Beet molasses, Sunflower meal extr., Mikrovitamin premix, Magnesium oxide, wheat flour.

Dose per 100 kg d.v. 890 g for hard work per day

www.effector.com

## GALLOPRACER muesli

20

Barley, corn, hydrothermally treated barley, hydrothermally treated corn, wheat bran, alfalfa meal, hydrothermally treated peas, dried beet cuttings, rapeseed vegetable oil, apple pomace, monocalcium phosphate, sunflower meal extracted, calcium carbonate, magnesium oxide, soybean meal extracted, flax seed, milk thistle, beet molasses, sodium chloride

Dose per 100 kg b.w. 700 g for medium work and 820 g for hard work per day

www.effector.com

## MASH

20 kg

hydrothermally treated barley, wheat bran, extruded flax, hydrothermally treated corn, apple pomace, rapeseed vegetable oil, calcium carbonate

Dose per 100 kg b.w. from 30 g to 100 g per day

Supplementary feed intended for high-performance endurance Arabian horses in training and the racing season. It provides the ideal ratio of highly digestible protein and available sources of increased energy.

|                       |         |    |       |         |          |    |        |

| Starch                | 335 g   | Na | 4,3 g | Biotin  | 0,3 mg   | Zn | 115 mg |
| Sugar                 | 33 g    | K  | 6,8 g | Vit. C. | 38 mg    | Se | 0,6 mg |
| Crude protein         | 109 g   | Cl | 6,9 g | Co      | 0,36 mg  | I  | 1,9 mg |
| + vitamins of B group |         |    |       |         |          |    |        |

Supplementary feed mixture intended for horses in racing mode. The highly effective fodder completely complements the needs of the racehorse's metabolism at a low dose. It supports and accelerates regeneration after exercise, builds quality muscle mass, does not burden the body's digestion and, thanks to the unique ratio of highly digestible proteins and sugars and fats, keeps horses in optimal sports condition.

| Starch                | 349 g | Na | 2,4 g | Biotin  | 7,8 mg   | Zn | 153 mg  |
| Sugar                 | 37 g  | K  | 6,6 g | Vit. C. | 38 mg    | Se | 0,77 mg |
| Crude protein         | 116 g | Cl | 3,7 g | Co      | 0,42 mg  | I  | 1,35 mg |
| + vitamins of B group |       |    |       |         |          |    |         |

Dietary supplementary feed suitable for all categories of horses. In winter, it can be soaked in warm water and mixed into feed, which warms the digestive tract. It keeps the horse's peristalsis running normally. Supports digestion. Can be used in sports horse races to increase the desire to drink water. It has a balanced Ca:P ratio, so it can be added to any feed. It is also suitable for sick horses when standing for a long time in the box, it induces a feeling of satiety.
