

The **Effector** brand uses **medicinal plants** from all over the world, which are the basis of the sophisticated formulas of Effector products. The mutual **combination of extracts** of these plants simultaneously potentiates the effect of the entire mixture and thus achieves a unique positive effect on the horse's metabolism, health and performance.

made in Europe

**Feed supplements** for performance horses developed on the basis of twenty years of experience by nutrition specialists, **biochemists** and veterinarians. The Effector brand uses knowledge from **phytopharmacy** to bring **world-class** professionals a highly concentrated, effective solution for tuning the metabolism of top performance horses.

# EQUINE FEED SUPPLEMENTS

2016 FEWENI2

**HIGH CONCENTRATED**

**HIGH EFFECTIVE**

**CLEVER**

**FAST**

they effectively **influence** the horse's metabolism and provide **targeted** nutrition at the point of need. They shorten the **recovery** time, **accelerate** the growth of fitness, **improve** the horse's performance.

10-20 g/day

## ARTHROPEX 1000 g

- Joints and tendons inflammation
- Muscle attachments
- Repair musculoskeletal system
- Supply collagen
- Protect cartilage
- Anti-arthritic effect

Effectively removes inflammation in **joints, tendons** and **muscle** attachments. Thanks to the supply of **building materials** for tendons and cartilage (**peptides and organic sulfur**), it quickly strengthens and forms **fibers** of tendons and cartilage in the joint. **Hyaluronic acid** protects the surface of the cartilage in the joint **against abrasion**, and the Boswellia serrata plant extract has an **anti-inflammatory, anti-arthritic** and slightly pain-relieving effect.

Boswellia serrata, hyaluronic acid, MSM, hydrolyzed collagen

20-40 ml/day

## ARTHEON 1000 ml

- Vascular flexibility
- Against bleeding
- Strengthening of blood vessels
- Antioxidants
- Flavonoids
- Body's defences

Effectively supports the **flexibility** and **strength** of the **vessel wall**. Regulates the normal **functioning of the vascular system**. It dampens the negative effects of demanding training on the horse's **circulatory system**. Has an anti-inflammatory effect and protects the body from free radicals. Administering the product effectively increases the **flexibility of blood vessels**.

Aesculus hippocastanum, Acerola, Uncaria tomentosa, alfa-tokoferol, Centella asiatica, Cyclanthera pedanta, Aspalathus linearis, Terminalia arjuna, MCC

20-40 ml/day

## CALMER 1000 ml

- Reduces flatulence
- calms down
- dampens negative reactions
- increases concentration
- suppresses anxiety
- no sedation

Effectively **calms** the horse's **nervous system** and dampens the negative manifestations of **stress**. Can be used in situations where the horse is exposed to increased stress. Reactions to stimuli are milder after administration of the product and gradually disappear completely. It **reduces** the horse's **perspiration** and **increases** its **concentration and focus** on performance. It reduces the horse's **attention to distractions**.

Asparagus racemosus, Lepidium meyenii, Occimum sanctum, Withania somnifera, thryptophan, MCC

■ no sedation  
■ suppresses anxiety

20-50 g/day

## DIGEST 3000 g

- Reduces flatulence
- Supports digestion
- Adjusts the intestinal microflora
- Special yeast cultures
- Stops diarrhea
- Cleans the intestines from sand

Effectively supports **digestion**, thanks to the use of medicinal herbs, it reduces **flatulence** in the digestive tract. Supplements and adjusts the **intestinal microflora** and the composition of **digestive** microorganisms in the intestine. At the same time, it acts against **diarrhea** and reduces **unhealthy watery stools**. The use of unique raw materials helps to get rid of the **digestion** of unwanted sand, received together with stable feed.

Psyllium, Alltech yeast, Carum Carvi, Pimpinella anisum

they effectively influence the horse's metabolism and provide targeted nutrition at the point of need. They shorten the recovery time, accelerate the growth of fitness, improve the horse's performance.

## AFFECTOR 1000 g

- Lowers heart rate
- Optimizes water metabolism
- Maintains water for muscle cells
- Powerful antioxidant
- Rapid conversion of nutrients into energy
- Immune system support

10-20 g/day

## HEMO 750 g

- Hematopoiesis
- Increases erythrocytes
- Supports hemoglobin synthesis
- Increases defensiveness
- Increases oxygen carriers
- Extends endurance

10-20 g/day

## IONEX 1000 ml

- Replenish ions
- Mg, Ca, Na, K
- Maintains homeostasis
- Adjustment of blood pH
- Accelerates regeneration after exercise
- Powerful antioxidant

30-60 ml/day

## KERATOR 1000 g

- Rapid growth of fur, hooves
- Hoof horn quality
- Against skin diseases
- Antifungal
- Antibacterial
- Improves coat quality

10-20 g/day

## SHAMPOO 500 ml

- Against skin diseases
- Antifungal
- Antibacterial
- Improves coat quality
- Healthy and shiny coat
- soothes itchiness of the skin

2 x per a day

Effectively optimizes the organism's **water management**. It optimizes the **distribution** of water for **muscle cells**, thereby reducing **dehydration** and keeping the horse's **metabolism** functioning **longer** under high load. It **lowers the heart rate** and thereby extends the horse's possible performance time. It effectively increases metabolism, the **conversion** of nutrients into **energy**.

Beta vulgaris, alfa-tokoferol, MCC

Effectively promotes the **production of red blood cells** and at the same time promotes **hemoglobin** synthesis. Thus the importance of increasing the number of carriers in the blood for **oxygen**. Due to the higher oxygen content in the blood, the time for **endurance exercise** of the horse is significantly **extended**. It contains flavonoids and increases the **body's immunity**. It also promotes an increase in the amount of **immune cells**.

Acerola, Eutherpae oleracea, MCC

Effectively compensates the **loss of ions** through sweat. It quickly **replenishes** the necessary ions (electrolytes) in an easily **absorbable form** for the organism and prevents a negative impact on performance. It helps horses **after exercise**, heavy training, during competitions and anytime the horse sweats excessively. Optimizing the content of ions and water in the body is a prerequisite for **quality training** and **excellent horse performance**.

Magnesium chloride, Sodium chloride, Malpighia glabra juice, Potassium chloride, Calcium chloride, Magnesium oxide

Effectively accelerates growth and improves the **quality of hoof horn**. Nourishes **hoof and coat**. It has **antifungal**, **antibacterial** and **antiviral effects** on the body. Accelerates **skin healing** and improves coat quality. After administering the product, the coat is of better quality, **shinier**, **disease-free**, and the hooves are **more flexible**, the horn is of better quality and **grows faster**.

Azadirachta indica, Tecoma Lapacho, Centella asiatica, Asphalantus linearis, Desmondium ascendens, biotin, Zn-chelate, Cu-chelate.

It effectively **accelerates growth** and improves the quality of **fur and mane**. It has **antifungal**, **antibacterial** and **antiviral effects** on the body. Accelerates **skin healing** and improves coat quality. After regular washing, the fur is better quality, **shinier** and **repels dust**. **Soothes itchiness** and soreness of the skin.

Azadirachta indica, Tecoma Lapacho, Centella asiatica

they effectively **influence** the horse's metabolism and provide **targeted** nutrition at the point of need. They shorten the **recovery** time, **accelerate** the growth of fitness, **improve** the horse's performance.

10-20 g/day

## MUSCULMAX 1000 g

- Muscle growth
- Increases the distribution of energy
- 3 times more ATP in the muscles
- Supports cellular respiration
- Rapid conversion of nutrients into energy
- Better vitality

Effectively increases the horse's **muscle mass** during functional training. It breaks down subcutaneous fat and **converts** it into **usable energy**. It accelerates the **distribution of ATP** molecules to muscle cells, **3 times faster**. It supports **cellular respiration** and improves the horse's vitality.

Pfafia glomerulata, Beta vulgaris, Acerola, glutarcarrob, Tribulus terrestris, Citrus aurantium, Illex paraquariensis, Karnitin, beta-karoten, metionin, lyzin,

20-40 ml/day

## MYOTENDOR 1000 ml

- Relaxes the muscles
- Protects the tendons
- Suppresses inflammation
- Suppresses pain
- Breaks down free radicals
- Against joint inflammation

Effectively **relaxes** stiff **muscle fibers**, suppresses inflammation of muscles, **tendons** and **joints**. It helps the body cope with the **training load**. Mildly **relieves pain**, significantly **reduces inflammation** of the musculoskeletal system. It has strong antioxidant effects. **Strongly** suppresses **muscle** inflammation.

Boswellia serrata, Magnesium oxide, MCC

20-40 ml/day

## LIVDETOX 1000 ml

- Accelerates detoxification
- Regenerates liver cells
- Promotes the growth of liver cells
- Accelerates regeneration after exercise
- Powerful antioxidant
- Reduces free radicals

Effectively supports the **regeneration of liver** cells and the breakdown of **waste substances** after muscle work. It improves the **detoxification** properties of the liver. It **shortens** the horse's **recovery time** and increases its **endurance** during sports. Suitable for any type of training. It has a beneficial effect in conditions following infectious **liver diseases**. It has antioxidant effects that can reduce the negative effects of free radicals on the body.

Andrographis paniculata, Aspalanthus linearis, Capris spinosa, Cichorium intibus, Phylanthus niruri, Terminalia arjuna, MCC

20-40 ml/day

## RESPIGON 1000 ml

- Anti-inflammation of the respiratory tract
- Antihistamine effects
- Suppresses cough
- Dissolves and removes mucus
- Solves bronchitis
- Improves breathing

Effectively suppresses inflammation of the **respiratory tract**, suppresses **cough**, dissolves **phlegm** and facilitates **coughing**, and has **antihistamine effects**. It protects and supports the physiological functions of the **respiratory tract**. The use of the product is suitable for **bronchitis** and bacterial and **viral diseases** of the upper respiratory tract.

Adhatoda vasica, Aspalanthus linearis, Desmondium ascendens, Minthostachys setosa, Occimum sanctum, Spondias mombin, Acerola, MCC
